

KEVIN KIMANI MWAURA

Mid-Level Full Stack Developer

+254 727 596 922 • kevinkimani165@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#) • Nairobi, Kenya (Open to Remote)

PROFESSIONAL SUMMARY

Innovative and results-driven Full Stack Developer with 7+ years of progressive experience across software engineering, AI integration, mobile development and enterprise systems. Proven track record of delivering end-to-end solutions, from responsive web and mobile interfaces in React, Next.js, React Native and Swift to robust back-end services in Java, Python, C# .NET, FastAPI and Flask. Currently delivering HR and recruitment platforms at CCI Global, including PeopleOS, the Authority to Recruit (ATR) Job Portal, the CCI Connect app used by 3,000+ employees, and CareerBox's Global Application candidate portal and Applicant Tracking System (ATS). Hands-on expertise in ERP development, RESTful API design, cloud databases (Azure, PostgreSQL, MongoDB) and applied AI with LangChain and Google Generative AI APIs. Known for root-causing defects, testing thoroughly before release, and working closely with non-technical stakeholders in Agile, cross-functional teams across fintech, HR tech and enterprise software.

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, JavaScript, TypeScript, C# (.NET), Rust, SQL, Swift, React, Next.js, React Native, Flask, FastAPI, HTML5, CSS3, Tailwind CSS

AI & Machine Learning: LangChain, Google Generative AI API, NLP, AI Chatbot Development, Data Analysis, LLM Prompt Engineering, LLM Output Evaluation

Backend & APIs: RESTful API Design, Node.js, Spring Boot, ASP.NET Core MVC, Frappe Framework, Swagger, Gradle, Microsoft Graph API, OAuth

Databases & Cloud: SQL Server, Oracle, MariaDB, PostgreSQL, MongoDB, SQLite, Hive, Microsoft Azure

Mobile Development: React Native (iOS & Android), Swift, Mobile UI/UX, API Integration

CMS & Integrations: WordPress (Headless CMS), Orchard Core CMS, SharePoint, Active Directory, Windows Authentication, QuestPDF, OpenXML SDK

DevOps & Tools: Azure DevOps, Docker, Git, GitHub, Vercel, IntelliJ IDEA, VS Code

Testing & Quality: End-to-End & UAT Testing, Debugging & Root-Cause Analysis, Error Logging, Code Reviews

ERP & Enterprise Systems: ERP Development, Financial Reporting Systems, Applicant Tracking Systems, HR Tech, Audit Tools

Soft Skills: Cross-functional Collaboration, Agile/Scrum, Requirements Analysis, Technical Documentation (SRS), Client Relationship Management

PROFESSIONAL EXPERIENCE

Full Stack Software Developer | [CCI Global](#) | Tatu City, Kenya

Aug 2025 – Present

- Plan, track and deliver work in Azure DevOps across HR, recruitment and CareerBox training platforms, working with UI/UX, HR, operations and business stakeholders from requirements through deployment and post-launch support.

CareerBox – Global Application Candidate Portal — *Frappe Web Forms, Python, JavaScript, Jinja, CSS*

- Extend and maintain a candidate-facing onboarding portal with a 7-step profile, country-driven compliance forms, an application dashboard and application history; built a multi-application feature that prefills answers from a candidate's previous submission.
- Created a shared brand design-token system matched to CCI Global's live palette, and refined layout and navigation based on stakeholder feedback.
- Root-caused and fixed submission-blocking defects after a data-model rename (stale field mappings, broken redirect chains, a phone-field race condition), and fixed a script that silently wiped linked records before backfilling ~50 applications with zero errors.
- Ran end-to-end and UAT testing across five feature areas, added targeted error logging to server scripts, and tightened data exposure on candidate-facing forms.

CareerBox Applicant Tracking System (ATS) – Training Register & Integrations — *Frappe, Python, SQL*

- Provided Python scripting and backend support for the live ATS and CareerBox training project, streamlining the recruitment pipeline and improving hiring efficiency by 50%+.
- Gathered integration requirements for Sonic Prism (close-offs), the LMS (RAG statuses) and the Digital Register (training attendance), and flagged an outstanding third-party API as a delivery risk.
- Consolidated two overlapping training register reports into one with five optional filters, fixed a silent field-mapping failure, and added validated fields tested against ~7,500 records.

PeopleOS – HR Management Platform — *Next.js (TypeScript), Tailwind CSS, FastAPI, SQLite*

- Architecting an HR management platform for 1,000+ agents with real-time analytics dashboards, role-based access control, an interactive org chart and employee lifecycle management.
- Built bulk CSV import/export, automated SMTP email notifications, live KPI filters and a full Admin Panel for user management and audit logging.

Authority to Recruit (ATR) Job Portal — *ASP.NET Core MVC 8, C#, SQL Server, JavaScript*

- Developed a recruitment request application with multi-level approvals (Operations Manager > HOD > Managing Executive > EXCO) and a job-description library with versioning, search and PDF/Word generation (QuestPDF, OpenXML SDK).
- Integrated Frappe ERP (REST) and SharePoint via Microsoft Graph API with OAuth token management, designed SQL Server schemas and stored procedures, and implemented Windows Authentication.
- Resolved build-blocking namespace conflicts between third-party libraries and participated in Agile code reviews with UI/UX designers.

CCI Connect, Orchard Core & Campaign Capture — *React Native, WordPress, Orchard Core, Active Directory*

- Designed and developed CCI Connect, a cross-platform React Native app used daily by 3,000+ employees to access the intranet, HR policies and learning materials, backed by a headless WordPress CMS.
- Built an Orchard Core CMS website enabling senior management to publish job openings and manage learning content in the company LMS.
- Engineered a campaign capture web form integrated with Active Directory, featuring country-specific validation, role-based access and secure storage for multi-region campaigns.

Software Developer | E&M Technology House Ltd | Nairobi, Kenya (Remote-Friendly)

Jan 2024 – Dec 2024

- Engineered responsive, cross-browser web applications using Java, HTML5, CSS3 and JavaScript, improving UI performance and user engagement.
- Designed and delivered an ERP and Financial Reporting System for audit teams (Java, Spring Boot, SQL Server), improving reporting accuracy and reducing report generation time by 30%.
- Architected and implemented RESTful APIs enabling seamless communication between front-end and back-end microservices.
- Engineered a high-performance Rust transaction monitoring system for real-time fraud detection in financial operations.
- Developed an AI-powered chatbot using LangChain and Google Generative AI API for efficient PDF content querying, with robust fallback mechanisms.
- Contributed as a key team member on the Absa Financial Reporting project (JavaScript, Oracle, REST APIs), ensuring accurate, timely, audit-ready financial statements.
- Integrated SQL Server, Oracle and MariaDB with query optimisation and schema design, and maintained Git/GitHub workflows across distributed teams.

AI Trainer & Content Evaluator | Remotasks & Outlier | Remote

2023 – Dec 2023

- Created and refined test content to rigorous educational standards, applying psychometric principles and generative AI tools.
- Evaluated AI-generated responses for accuracy, coherence and contextual relevance, providing structured feedback that drove iterative model improvement.
- Crafted and curated diverse text datasets and fact-checked AI-produced content to improve LLM outputs across domains and difficulty levels.
- Developed AI-assisted assessment rubrics to evaluate the depth, curriculum alignment and educational impact of generated content.

Cash Relationship Officer | Equity Bank Kenya | Nairobi, Kenya

2021 – 2023

- Managed high-volume over-the-counter transactions (deposits, withdrawals, SWIFT transfers, RTGS and internal transfers), maintaining a zero-error record.

- Facilitated MoneyGram, Forex and M-Pesa transactions, demonstrating strong knowledge of financial products and cross-border payment systems.
- Leveraged in-depth banking product knowledge to build client relationships, consistently meeting and exceeding new client acquisition targets.
- Coordinated management calendars, reports and presentations, ensuring smooth administrative operations across the branch.

Loan Sales Agent | [Platinum Credit Kenya](#) | *Nairobi, Kenya*

2020 – 2021

- Drove new business by converting leads into loan agreements across civil servant, logbook, personal and asset finance product lines.
- Expanded the civil servant client base through a consultative, door-to-door sales approach built on strong communication skills.
- Produced market research reports informing business strategy and identifying emerging lending opportunities.

EDUCATION

ALX Software Engineering Programme

2023 – 2025

Holberton School, USA (Remote) • Graduated with Distinction

Bachelor of Science in Business Information Technology

2017 – 2022

Mount Kenya University • Second Class Honours

Kenya Certificate of Secondary Education (KCSE)

2013 – 2016

Maseno School

CERTIFICATIONS & TRAINING

- Google Cloud Certification
- Generative AI: Introduction to Large Language Models
- Introduction to Prompt Engineering for Generative AI (2023)
- Java Algorithms, Data Structures, Collections & Exception Handling
- Java Essential Training: Objects and APIs
- Swift: Delegations and Data Sources
- Cyber Security Essentials
- Agape Leadership Training
- HubSpot Operations Management Diploma – HubSpot Academy (In Progress)

KEY PROJECTS

Wadau Pool Mini League – Tournament Website

Next.js | Chart.js | Vercel

- Built and maintain a public tournament website tracking standings and match history across multiple seasons, with Chart.js analytics, animated stat counters, a season timeline, MVP cards and shareable recap cards.

OCR Document Validation System (ocr_validator)

Frappe / ERPNext | Python | JavaScript

- Built a CCI-branded candidate upload portal with token-based URLs, custom DocTypes, whitelisted APIs and an OCR job queue, and authored its version 2.0 Software Requirements Specification.

AI PDF Chatbot Interface

Python | LangChain | Google Generative AI API | NLP

- Engineered a generative AI chatbot that processes and intelligently queries PDF documents, featuring a custom fallback system for graceful error handling and a consistent user experience.

Online Bus Ticketing System

Web Application | Full Stack Development

- Developed a full-stack online bus ticketing platform enabling passengers to search routes, book seats and process payments in real time, with an admin dashboard for fleet and schedule management.
