KEVIN KIMANI MWAURA

Full Stack Developer & Systems Engineer

+254 727 596 922 • kevinkimani165@gmail.com • GitHub • Portfolio • Nairobi, Kenya (Open to Remote)

PROFESSIONAL SUMMARY

Innovative, results-driven Full Stack Developer with 7+ years of progressive experience across software engineering, enterprise systems, AI integration, mobile development and fintech. I deliver end-to-end solutions, from responsive web and mobile interfaces in React, Next.js and React Native to robust back ends in Python, C#/.NET, Java and Node.js. At CCI Global I build HR, recruitment and training platforms including PeopleOS, the Authority to Recruit (ATR) portal, a Training Room Booking System, the CCI Connect app used by 15,000+ employees, and CareerBox's candidate portal and ATS. As an independent consultant I also architect and deliver custom ERP and healthcare systems for businesses in Tanzania. Known for root-causing defects, testing thoroughly before release, and working closely with non-technical stakeholders in Agile teams.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, C# (.NET), Java, Rust, SQL, Swift, React, Next.js, React Native, Node.js, FastAPI, Flask, Tailwind CSS

Backend & APIs: RESTful API design, ASP.NET Core (MVC and Web API, EF Core), Spring Boot, Frappe Framework, Next.js server actions, Microsoft Graph API, OAuth, Swagger

Databases & Cloud: PostgreSQL (Neon), SQL Server, MariaDB, Oracle, MongoDB, SQLite, Redis, Drizzle ORM, Microsoft Azure, Vercel

AI & Automation: LangChain, Google Generative AI API, LLM prompt engineering and output evaluation, OCR pipelines, workflow automation and alerting

ERP & Integrations: ERP development, Frappe/ERPNext, applicant tracking systems, SharePoint, Active Directory, headless WordPress, Orchard Core CMS, QuestPDF, OpenXML SDK

DevOps & Quality: Azure DevOps, Git/GitHub, Docker, CI/CD, end-to-end and UAT testing, root-cause analysis, error logging, code reviews

Ways of Working: Agile/Scrum, requirements analysis, database design, technical documentation (SRS), client and stakeholder management

PROFESSIONAL EXPERIENCE

Full Stack Software Developer & Systems Engineer | CCI Global | *Tatu City, Kenya* *Aug 2025 – Present*

- Plan, track and deliver work in Azure DevOps across HR, recruitment and training platforms, working with UI/UX, HR, operations and business stakeholders from requirements through deployment and support.

Training Room Booking & Management System — *Next.js, TypeScript, ASP.NET Core Web API, EF Core, PostgreSQL*

- Building, with a colleague, a system for booking and managing training rooms, with roles for employees, trainers and the Training Team.
- Designed the database and presented it to stakeholders; implemented shift-based booking rules where requesters choose morning, afternoon or night and the Training Team sets standard or custom shift times.
- Code managed on the company Azure DevOps and built to CCI Global brand guidelines.

CareerBox — Global Application Candidate Portal — *Frappe Web Forms, Python, JavaScript, Jinja, CSS*

- Extend and maintain a candidate onboarding portal with a 7-step profile, country-driven compliance forms, an application dashboard and a multi-application feature that prefills answers.
- Root-caused and fixed submission-blocking defects after a data-model rename, fixed a script that silently wiped linked records, then backfilled ~50 applications with zero errors.
- Ran end-to-end and UAT testing across five feature areas, added targeted error logging, and tightened data exposure on candidate-facing forms.

CareerBox Applicant Tracking System — Training Register & Integrations — *Frappe, Python, SQL*

- Python scripting and backend support for the live ATS, streamlining the recruitment pipeline and improving hiring efficiency by 50%+.

- Gathered integration requirements for Sonic Prism, the LMS and the Digital Register, and flagged a third-party API dependency as a delivery risk.
- Consolidated two overlapping training registers into one report with five filters and added validated fields tested against ~7,500 records.

PeopleOS — HR Management Platform — *Next.js (TypeScript), Tailwind CSS, FastAPI, SQLite*

- HR platform for 1,000+ agents with analytics dashboards, role-based access control, an interactive org chart, bulk CSV import/export, automated email notifications and audit logging.

Authority to Recruit (ATR) Job Portal — *ASP.NET Core MVC 8, C#, SQL Server, JavaScript*

- Recruitment request application with multi-level approvals (Operations Manager > HOD > Managing Executive > EXCO) and a versioned job-description library with PDF and Word generation.
- Integrated Frappe ERP (REST) and SharePoint via Microsoft Graph with OAuth, designed SQL Server schemas and stored procedures, and implemented Windows Authentication.

CCI Connect, Orchard Core & Campaign Capture — *React Native, WordPress, Orchard Core, Active Directory*

- Designed and developed CCI Connect, a cross-platform React Native app used daily by 15,000+ employees for the intranet, HR policies and learning materials, backed by a headless WordPress CMS.
- Built an Orchard Core CMS site for publishing job openings and learning content, and an Active Directory–integrated campaign capture app with country-specific validation.

Independent Software Consultant & Solutions Architect | Freelance | *Nairobi / Dar es Salaam (Remote)* *2025 – Present*

- **Truck & Trailer ERP** (Next.js, TypeScript, PostgreSQL, Drizzle, Vercel): sole architect and developer of a custom ERP for a Tanzanian truck importer and repair business, covering repairs, inspections with photos, inventory, procurement, sales and CRM, finance and HR, with role-based permissions; delivered in phases, starting with a repair-workflow MVP.
- **Hospital Reception & Queue Ticketing**: built and demoed a patient registration and queue-ticketing app for an eye hospital in Dar es Salaam, designed to work alongside the hospital's existing HMS.
- **Client websites**: designed and deployed responsive portfolio and business websites with SEO and analytics.

Software Developer | E&M Technology House Ltd | *Nairobi, Kenya (Remote-Friendly)* *Jan 2024 – Dec 2024*

- Designed and delivered an ERP and financial reporting system for audit teams (Java, Spring Boot, SQL Server), improving accuracy and cutting report generation time by 30%.
- Engineered a high-performance Rust transaction-monitoring system for real-time fraud detection.
- Developed an AI chatbot with LangChain and the Google Generative AI API for querying PDF content, with robust fallbacks.
- Key contributor on the Absa financial reporting project (JavaScript, Oracle, REST APIs), delivering audit-ready financial statements.
- Built responsive web applications and RESTful APIs between front-end and back-end services; optimised SQL Server, Oracle and MariaDB schemas and queries.

AI Trainer & Content Evaluator | Remotasks & Outlier | *Remote* *2023*

- Evaluated and fact-checked AI-generated responses and code, curated datasets, and designed AI-assisted assessment rubrics that drove model improvement.

Cash Relationship Officer | Equity Bank Kenya | *Nairobi, Kenya* *2021 – 2023*

- Managed high-volume transactions (deposits, SWIFT, RTGS, M-Pesa, Forex, MoneyGram) with a zero-error record, and consistently met new client acquisition targets.

Loan Sales Agent | Platinum Credit Kenya | *Nairobi, Kenya* *2020 – 2021*

- Converted leads into loan agreements across civil servant, logbook, personal and asset finance products, and produced market research reports.

EDUCATION

ALX Software Engineering Programme *2023 – 2025*
Holberton School, USA (Remote) • Graduated with Distinction

Bachelor of Science in Business Information Technology *2017 – 2022*
Mount Kenya University • Second Class Honours

Kenya Certificate of Secondary Education (KCSE) *2013 – 2016*
Maseno School

CERTIFICATIONS & TRAINING

- Google Cloud Certification — Generative AI: Introduction to Large Language Models
- Introduction to Prompt Engineering for Generative AI (2023)
- Java Algorithms, Data Structures, Collections & Exception Handling; Java Essential Training: Objects and APIs
- Swift: Delegations and Data Sources
- Cyber Security Essentials
- Agape Leadership Training
- HubSpot Operations Management Diploma — HubSpot Academy (In Progress)

KEY PROJECTS

Wadau Pool Mini League — Tournament Website — *Next.js, Chart.js, Vercel*

- Public tournament site tracking standings and match history across seasons, with analytics, a season timeline, MVP cards and shareable recaps.

OCR Document Validation System — *Frappe / ERPNext, Python, JavaScript*

- Candidate upload portal with token-based URLs, custom DocTypes, whitelisted APIs and an OCR job queue; authored its v2.0 Software Requirements Specification.

Portfolio with Visitor Analytics & Alerts — *HTML, CSS, JavaScript, Vercel Functions, Redis*

- Personal portfolio with light and dark modes, plus a serverless visitor-analytics pipeline with a private dashboard and real-time email and WhatsApp alerts.

Online Bus Ticketing System — *Full Stack Web Application*

- Route search, seat booking and real-time payments, with an admin dashboard for fleet and schedules.
